

HIBERNATE

Yellow-bellied Marmot

Some rodents will curl into a tight ball and let their body temperature drop to nearly freezing.

Garter Snake

Reptiles and amphibians can settle down into the mud until the ground begins to thaw.

Chipmunk

California Ground Squirrel

American Bullfrog

These animals find a snug place to sleep through the winter.

Bears are **not** TRUE HIBERNATORS

Many bears will stay in a den for a couple weeks at a time.
